F&T TERRIX®

BUILDING AND CONSTRUCTION FINISHES

CASE STUDY

Dinas Powys

North Wales

Regeneration project North Wales, External Wall insulation.

Solution

Extremely dilapidated properties were refurbished using TERRIX® EWI-W1 and EWI-E2.

Designed to enhance thermal insulation of properties slowing the loss of heat, reducing energy bills whilst improving the overall visual appearance, adding value and protected for the long term.

TERRIX® EWI-W1 and EWI-E2 insulation solutions.

The Terrix® systems are the best product available due to its unique features:

- **In-built protection of heat contributes to insulation**
- **Breathability and moisture protection**
- **Flame retardancy**
- **Long life colour with low maintenance**
- **Black mould and algae resistant**
- **No delamination, no blistering or peeling or cracking**
- **Enhanced protection from the effects of weathering**
