Vale of Rheidol Railway

Materials: Terrix Quartz Brick Slips

Terrix External Render

EPS Boards & Base - Replication of original beams

Client: AFAN Construction Ltd - Applicator SPMS (Wales) Ltd

This incredible old steam railway maintenance shed has been converted into a museum and event venue. The finish is stunning, making it feel like stepping back in time. Each tile is completely unique, crafted from quartz and special resin. These hand-made brick slips are designed to replicate the original vintage bricks, preserving the style and heritage of the building. They are lightweight, allowing them to be used on nearly any facade without requiring additional reinforcement or foundation. The polymer-based adhesive is extremely quick to apply, serving as both mortar and an easy-to-use pointing material.

Terrix Brick slip breathable system, with chemically bonded adhesive, permanently connects to the substrate.,

Best in Class A Flame retardancy, non organic means no spread of flame

Reduced programme & commercial costs on foundations & frame

Fully protective against fungus and black mould.

No cavity required for SFS or timber frame

Long lasting colour

Chemical bonding to substrate, means no delamination

Speed of application outperforms any other comparative system.

Frost resistant, no water penetration

Minimal long term maintenance

Easy application no heavy tools required

F&T TERRIX® RENOVATION PRODUCTS CAN BE TURNED INTO A WORK OF ART IN THE RIGHT HANDS.
