

TERRIX®
Official Importer

Brick effect catalogue 2025 - 2026

TERRIX®
stone & brick

Best in Class A Flame retardancy

Non organic means no spread of flame

No cavity required for SFS or timber frame

Vapour permeable (fully breathable)

Long lasting colour-Keeps our cities bright

Black mould and algae resistant

Chemical bond means no delamination

No risk of cracking

No water penetration

Frost resistant

No flashing meaning, minimal long term maintenance

Speed of application outperforms any other comparative system

TERRIX EWI RENDER SYSTEMS ARE
THE PERFECT COMBINATION

 **TERRIX**[®]
stone & brick

properties

Welcome to our Terrix® Brick Slip catalogue, a comprehensive showcase of our technically sophisticated and visually unique facade solutions.

With state-of-the-art technology and extensive experience, our dedicated team is proud to present the Terrix® BSS-1 Brick Slip System. This pioneering product sets a new standard in the market. This system, crafted using the highest quality quartz sand and special resins, is indistinguishable from genuine brickwork in its exceptional realism. The Terrix® brick slips are aesthetically pleasing and boast unique properties. They are fire-resistant, waterproof, vapour-permeable, and resistant to algae growth, ensuring a lightweight and durable product.

These brick slips come in various standard colours and four textures, with the option for custom colours on request. Our innovative manufacturing process ensures that each tile is unique in colour and texture, creating facades that emulate traditional bricks with stunning accuracy.

The Terrix® brick slips are incredibly light, allowing for their application on almost any facade without additional reinforcement or foundation. By choosing our system, you're opting for a solution that is durably bonded to the substrate, offering long-lasting performance and a remarkable aesthetic appeal.

main properties

light weight (4kg/m2)

vapour preable

easy installation

high flexibility

frost resistant

algae resistant

fire resistant
(cat. A2 for m. wool based EWI system)

great value

required tools

laser level spirit and

Cutting tool

small pointing brush

tape

notched trowel

Terrix® brick slips do not require any complicated tools for installation. The process is similar to tiling but much simpler. Simply apply the mortar, press on the brick, and finish with a single stroke of a firm brush for pointing. That's it! One applicator can install up to 12 m² of Terrix® brick slips in a day.

Terrix brick slip can be produced in any shape or size up to a maximum of 800mm x 1000mm

There are various corner options here are some examples.

- B: Preformed
 - C: Elongated in size (length) and hand formed
 - D: Preformed
 - E: Elongated in size (width) and hand formed
- Hand formed by trimming a 1mm V from the back and hand bending to shape
